

DigiGreet Enterprise is a digital signing in system

Applications

It can be used in receptions to offer a smarter experience for visitors, staff or contractors.

Why use the system?

Compared to a paper based system, DigiGreet greatly reduces administration costs and time. It is easy to use with minimal training.

It is available with a "no hassle" set up for a monthly charge.

See who is on your premises at any time, you can also see times, frequency and a host of other useful information to help you manage the business.

How does it benefit the user?

It looks great and gives visitors a positive first impression.

It remembers you and can give you personalised reminders and messages on arrival and exit.

- Up and running in no time.
- GDPR Compliant.
- Badge Printing
- Visitors & Staff Fob Scanning
- Communicate better with personal messages for visitors and staff.
- Look the part -use your Branding.
- Compliance -see who is on site 24/7.
- Flexible efficiency -multiple users at different entrances.
- Time Management -see contractors sign in and out.
- Built in fire drill check and history.

System Features

Monitoring - Real time reports on who is on the premises. In an emergency situation, everyone can be accounted for easily.

Branding - The main screen of DigiGreet can be customised to take on board your logos and colours.

Printing - You can print off branded visitor/ID badges (Including photo of visitors).

Fire log reports - DigiGreet allows you to take a register of all the people on site in a fire drill, keeping a log for health and safety purposes.

Health Safety - Have a pre-requisite questions or an agreement before a visitor can sign in, DigiGreet can take this into account.

Multi-Site - Manage visitors and staff across multiple sites

Staff and Visitors - Manage staff differently to visitors

Reporting - See key visit data such as contractor time sheets, daily visitor numbers and late arrivals

Fobs - Already have staff key fobs or cards, we can link them to DigiGreet. For visitors we can add a barcode to their badge so if they are popping out for some food they can tap out. Also, setup temporary fobs for Visitors

Email Notifications- Waiting for a visitor to arrive, once they do our system can send you an email notification to let you know.

Messages- If you like you could add a welcoming message for the day for visitors or a reminder for an event coming up when they are leaving.

Alerts- If staff member are not on site, our system can let the visitor know.

Security- ID Verification for contractor's passes/permits/licences etc.

Pre-Registration- Send an invite link to visitors so they are able to register beforehand to make the sign in process quicker on arrival.

Updates- We are always adding new useful features to DigiGreet, within Enterprise you will get access to these at no extra cost.

Standout

What makes us different from other providers is we can adapt the system to meet your needs giving you better solutions. *

* Terms and conditions apply.
